GCE Advanced Subsidiary Level and GCE Advanced Level

MARK SCHEME for the May/June 2014 series

9706 ACCOUNTING

9706/21

Paper 2 (Structured Questions – Core),
maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2014 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

- (d) (i) Matching ensures that all income (1) and expenditure (1) are recognised in the financial (1) period in which they occur. The timing of payment (1) is irrelevant, i.e. if goods are sold in year one but not paid for until year two, then the sale is recognised in year one (1). **[Max 3]**
- (ii) Materiality allows that if the amount of a transaction is insignificant 1, then the accepted treatment of that transaction may be disregarded (1). For example, the purchase of an stapler, which may last for several years, would tend to be treated as revenue rather than capital expenditure, and the stapler itself would not be included in non-current assets (1).

Materiality is decided on the following factors:

- Will the cost of using the normal treatment of an item outweigh the benefit obtained? (1)
 Will the disclosure of an item (e.g., the stapler mentioned above) make any difference to the decisions made by the person reading the financial statement? (1) **[Max 3]**

Machinery	$\$64\,000 \times 25\% = \$16\,000$ (1)
	$\$18\,000 \times 25\% \times 9/12$ (1) = \$3 375 (1 of)
Motor vehicle	Per ledger account \$4 080 (1 of)
	Total charge for year \$25 455 (1of)

[6]

(c) Goodwill is an intangible non current asset (1) which can arise due to a business's reputation, (1) location, (1) staff quality (1)
It is the excess of the value of the business over the book value of the net assets (1) [5]

(d) As this is not purchased goodwill (1) it is not shown in the books of account (1) and must be written off against the capital accounts (1) of the partners in their profit sharing ratios (1). [4]

Direct labour	8.50	
Factory overheads	3.00	
Selling and administration overheads	<u>2.50</u>	<u>20.50</u> (1)
Contribution		<u>11.50</u>

Fixed costs = $\$3.50 + \$5.00 = \$8.50$ (1) $\times 18\,000 = \$153\,000$

Breakeven point = $\$153\,000$ (1) / $\$11.50$ (1) = 13 305 units (1of)

[5]

(b) Breakeven as % of capacity = $(13\,305$ (1) / $24\,000$ (1)) $\times 100 = 55.44\%$ (1) [3]

(d) Workings

Revised capacity = $24\,000 \times 1.1 = 26\,400$ units

Revised demand = $18\,000 \times 1.5 = 27\,000$ units

Revised selling price = $\$32.00 \times 0.875 = \28.00

Machinery depreciation = $(\$45\,000 - \$5\,000) / 5 = \$8\,000$ per annum

Revised fixed selling and administration costs = $(\$3.50 \times 18\,000) \times 1.1 = \$69\,300$

Revised total fixed overheads = $\$153\,000 + \$8\,000 + \$6\,300 = \$167\,300$

Revised contribution = $\$28.00 - \$20.50 = \$7.50$

Breakeven point = $\$167\,300$ (3) / $\$7.50$ (1) = 22 307 units (1) [5]

(e) Breakeven as % of capacity = $22\,307 / 26\,400$ (2) = 84.5% (1) [3]

(f)

	\$	\$	
Sales (26 400 × \$28)		739 200	(1)
Variable costs			
Direct materials (26 400 × \$6.50)	171 600

Less: Fixed overheads		<u>167 300</u>	
Profit		<u>30 700</u>	(1)

[4]

(g) The directors should not go ahead with their plans. (1)

- Profit falls from \$54 000 to \$30 700
- Breakeven point increases from 13 305 units to 22 307 units
- Unit contribution falls from \$11.50 to \$7.50
- Investment may cause cash flow problems
- Estimate of 50% increase in demand may be over-optimistic
